Professional Summary

.NET developer focused on building web applications using C#, ASP.NET Core, Entity Framework Core, and relational databases. I have hands-on experience building REST APIs, JWT authentication, layered architecture, Clean Architecture, and continuous integration with GitHub Actions. Currently pursuing a Software Engineering degree, I aim to contribute to development teams on corporate projects, delivering scalable, well-organized, and maintainable solutions.

Education

Unicesumar

2024 – 2028 (In progress)

Bachelor's Degree in Software Engineering

Featured Projects

Project Korp

GitHub

Distributed System for Electronic Invoice (NF-e) Management

- Development of a microservices-based application using .NET 8.
- Applied Clean Architecture for decoupling, organization, and scalability.
- Implemented JWT authentication and API Key middleware.
- Data persistence using PostgreSQL and Entity Framework Core.
- Automated pipeline using GitHub Actions with continuous deployment to Railway.

Portfolio

Vercel

Professional Portfolio Built with Angular 21

- Development of a modern application using Angular 21, TypeScript, and a Standalone Components architecture.
- Implemented Angular Signals, RxJS, OnPush Change Detection, and on-demand loading with `@defer` and Lazy Loading.
- Full internationalization system (Portuguese, English, and Spanish) with reactive updates using Signals.
- Responsive interface built with Tailwind CSS, dark/light theme support, interactive animations, and a focus on accessibility.
- Contact form integration using EmailJS.
- Performance optimization reducing the initial bundle by approximately 31%, plus automated continuous deployment to Vercel.
- Automated testing using Vitest.

Experience

Prefeitura Municipal de Pojuca

Pojuca, BA

Information Technology Intern

Jun 2025 – Dec 2025

- Provided technical support to internal users, resolving incidents related to hardware, software, and infrastructure.
- Supported IT infrastructure maintenance, contributing to the stability of technology services.
- Handled requests from administrative departments, ensuring operational continuity.
- Collaborated with technical teams on problem-solving and maintenance of computing environments.

Technical Skills

- **Languages:** C#, SQL, TypeScript.
- **Backend:** .NET 8, ASP.NET Core, Entity Framework Core, REST APIs, JWT Authentication, xUnit.
- **Frontend:** Angular 21, HTML5, CSS3, Tailwind CSS, Reactive Forms, Angular Signals.
- **Databases:** SQL Server, PostgreSQL, Relational Modeling, Normalization, Entity Framework Core.
- **Tools:** Git, GitHub, GitHub Actions, Railway, Linux.
- **Architecture & Best Practices:** Clean Architecture, SOLID, Object-Oriented Programming (OOP), Clean Code.

Soft Skills

- Quick to learn new technologies.
- Analytical mindset focused on problem-solving.
- Organized, with strong attention to code quality.
- Strong communication and teamwork.
- Interested in software architecture, distributed systems, and enterprise application development.

Languages

- Portuguese: Native.
- Spanish: Advanced (C1).
- English: Intermediate (technical reading).
